## Welcome to Fernland

[fernland.com.au](http://fernland.com.au)

**Fernland** is an Australian family-owned and operated business with a 45-year history, specialising in horticultural products for various industries, including nurseries, agriculture, landscaping and turf-care.

We pride ourselves on excellent customer service, a wide range of quality products, and knowledgeable staff. Our success is built on strong values, including honesty and commitment to customer needs. Serving clients across Australia and internationally, we offer extensive expertise and support through our dedicated team.

Our research ensures we provide market-leading products, and our built-to-purpose warehouse ensures efficient supply throughout Australia.

We're dedicated to offering 'A Growing Advantage' with our exceptional service and product range, ready to assist with any inquiry, regardless of its nature or size.

## *"Agronomy expertise with Fernland"*

[fernland.com.au](https://fernland.com.au)

---

We're excited to share a milestone development at **Fernland**: we've welcomed an Agronomist to our team!

This marks a new era in the level of expertise and support we offer. Our agronomist specialises in soil management, plant health, and sustainable practices, providing customised insights to boost your success in growing.

### Benefits of working with our **Agronomist**:

- **Maximise yields and soil health:** Get tailored strategies to optimise your resources and unlock your nursery's full potential.
- **Stay ahead of the curve:** Access the latest innovations and methods for sustainable, high-performing plant production.
- **Proactive problem-solving:** Identify and address plant and soil issues early, ensuring the long-term health of your operation.
- **Efficiency and growth:** Tap into expert knowledge to improve efficiency, reduce risks, and drive the future of your business.

At **Fernland**, we are committed to providing you with the best possible resources. Our Agronomist is readily available to meet, understand your unique needs and demonstrate how we can partner for your growing success.

Please connect with our team to learn more! Or connect directly via **M: 0456 800 972**.

## Excellence in Horticulture Since 1978

[fernland.com.au](http://fernland.com.au)

Since 1978, **Fernland** has stood for quality and innovation in the horticultural industry. As an Australian owned business, we have cultivated a legacy of excellence, providing comprehensive supplies for nursery, turf, landscape, and protected cropping needs. Our global network and deep-rooted expertise fuel our mission to deliver cutting-edge products, fostering growth and innovation in every project.

### Why Choose Fernland?

- **Dedicated Ownership:** Our team, with a legacy since 1978, ensures a wealth of experience and a commitment to the horticultural community.
- **Global Network:** Access to the latest and most effective products through our vast local and international network of contacts and supply partners.
- **Product Excellence:** From nursery essentials to advanced turf care and protected cropping supplies, we provide comprehensive solutions for superior plant growth and project success.
- **Customer Service:** Our customer service team is at the heart of **Fernland**, dedicated to supporting your needs with expertise and a personal touch.

As your partner in horticulture, we're here to ensure your success with our quality products and knowledgeable support. Experience the Fernland difference today.

### Our Divisions & Specialist Services

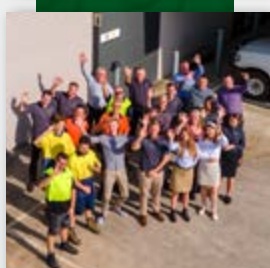

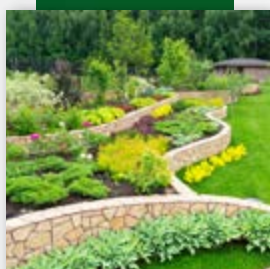

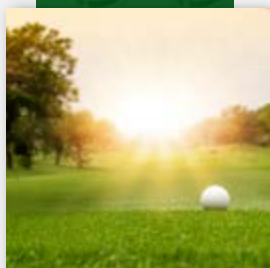

- **Nursery Supplies:** With a complete range of products, we support your plants from planting to sale, ensuring quality growth and yield. Our dedicated nursery field team is always ready to assist with their expertise.
- **Turf Care Products:** Achieve professional-grade surfaces with our comprehensive turf care solutions, perfect for sports fields, golf courses, and more. Our turf-care field team is on hand to support your quest for exceptional playing surfaces.
- **Landscape & Revegetation Supplies:** From revegetation projects to large landscaping developments, we offer products and support for sustainable and impressive results. Our landscape and revegetation field team can help tailor your project needs.
- **Protected Cropping Supplies:** Specialising in the protected cropping sector, we provide tailored solutions for efficient and productive horticulture. Contact our protected cropping field team for expert advice and quality products.

### Our Sales Consultants: Your Experts on the Ground

At **Fernland**, our field sales representatives are specialists in their respective areas, equipped with the knowledge and expertise to provide bespoke solutions and support. Whether you are looking for advanced turf care techniques, nursery supplies, landscape solutions, or protected cropping innovations, our field teams are dedicated to assisting you in achieving optimal results for your projects.

### Contact Us

For a growing advantage, reach out to **Fernland**. Let's cultivate success together.

## What You Get From Fernland

At **Fernland**, we uphold a strong set of core principles that drive our commitment to exceptional customer service. This foundational code has earned us a loyal customer base, with over 90% of our customers recommending us to their friends and colleagues. Our dedication to these principles has allowed us to thrive for over 45 years in the industry.

What our customers say about us on:

*“Been dealing with Fernland for around 20 years now. Simply the best customer service anywhere. While being modern and up to date with technology they also remember to be strong with good old fashioned service with lots of personal attention. These guys set the standard.”*

**Jason.**

*“Huge range of products for all your horticultural needs! Growing mediums, fertiliser, pots, secateurs, safety equipment, shadecloth, shade houses and much more! The staff have been amazingly helpful and always help me find the right tool for the job. Thanks guys! You’ve made my steep learning curve a LOT easier!”*

**Megan.**

*“Now wasn't that easy”*

## Plantacote Features & Benefits

Add to your order

- ▶ Premium full spec product
- ▶ Every prill homogenous with NPK and trace elements
- ▶ Ammonium nitrate nitrogen source
- ▶ High trace element level
- ▶ High iron content (50% chelated)
- ▶ Ultra-safe damage resistant coating
- ▶ Release pattern to match plant development,
- ▶ Extra nitrogen in early growth,
- ▶ Extra potassium in later growth.

Add to your order

**Coated NPK fertiliser with magnesium and micronutrients, available with release times of approx. 4, 6, 8, 12 or 16 months.**

## Key Benefits

- Comprehensive nutrient coverage: Every granule provides a balanced supply of essential nutrients including nitrogen, phosphorus, potassium, magnesium, and trace elements.
- Enhanced plant health and growth: High iron content, with 50% chelated as Fe-EDTA, ensures robust foliage colour and vitality.
- Consistent nutrient delivery: Controlled release mechanism regulated by soil temperature, aligning with plant growth cycles.
- Substrate and pH independent: Effective in various growing media and unaffected by pH levels.
- Safe for crops: Minimises salt stress risk, suitable for premixed media with up to 2-3 weeks of stability before nutrient starts to release.
- Labour-efficient: Reduces the need for additional trace element applications and frequent fertilisation.
- Growth stage-specific nutrient release: Tailored to provide more nitrogen during early growth and more potassium in later stages.
- Reliable under stress: Durable coating prevents nutrient loss under extreme conditions and ensures a delayed start to nutrient release.

### Typical Analysis: 8 mth Plantacote PlusS

NPK fertiliser containing magnesium, 14-3.4-12.5 (1.2) and micronutrients

<b>14%</b>	<b>N</b>	Total Nitrogen 6.3% N nitric nitrogen 7.7% N ammoniacal nitrogen

## Florafert SRF Enhance

Methylene-urea based slow release NPK fertiliser with magnesium and trace elements with a release time of approx. 8 - 10 weeks.

### Key Benefits

- Complete Nutrition: Provides all essential macro and micro-nutrients.
- Needs-Based Release: Fertiliser release matches plant requirements for optimal growth.
- Immediate and Sustained Effect: Combines a starter boost with controlled release for sustained nutrition.
- Extended Pre-Use Storage: Fertilised substrates can be stored cool and dry for 2-3 weeks before use.
- Reduced Salt Damage: Minimises risk of damage from high substrate (soil) temperatures.
- Plant-Friendly: Highly compatible with various plant species for safe application.
- Easy Mixing: Can be mechanically mixed into growing mediums.
- Long-Lasting Effect: Provides nutrition over an 8-10 week period.
- Controlled Nitrogen Release: Contains 70% methylene urea for temperature-dependent release in sync with plant needs.

### Typical Analysis: FloraFert SRF Enhance

NPK fertiliser containing ureaformaldehyde, magnesium, 22.10-2.4-12.10 (6) and micronutrients

<b>22.10%</b>	<b>N</b>	Total nitrogen 0.4 % N Ammonia Nitrogen 6.3 % N Urea 15.4 % N Methylene Urea

<b>0.005%</b>	<b>Mo</b>	Molybdenum
<b>0.004%</b>	<b>Zn</b>	Zinc
<b>Low in Chloride</b>		

## Florafert SRF 40N

Slow release nitrogen fertiliser for special horticultural crops, turf and amenity areas with longer Nitrogen release duration.

### Key Benefits

- Non-burning, high crop safety with a low salt index, reducing the risk of plant damage.
- Provides a consistent and extended nitrogen supply over 4 to 8 months, ensuring prolonged nutrient availability for plant development.
- Slow release nitrogen is liberated by microbial action, matching plant growth needs and reducing nutrient leaching.
- Reduces the need for frequent applications, saving time and labour costs.
- Promotes high sward density in turf, leading to a lush, thick grass cover.
- Minimises rapid growth spurts, resulting in less frequent mowing and maintenance.
- Enhances the aesthetic appeal of turf with a satisfactory appearance over time.
- Encourages stronger root development, contributing to the overall stability and health of plants.
- Boosts plant health, increasing resistance to stress conditions like drought.
- Environmentally safe, with a controlled release mechanism that minimises nitrogen loss to the environment.

### Typical Analysis: FloraFert SRF 40N

Ureaformaldehyde (methylene-urea)

<b>40%</b>	<b>N</b>	Total nitrogen 6% N carbamide nitrogen 34% N methylene urea

## Controlled Release Fertilisers

Add to your order

### The Advantages of FloraCote®:

- Full spec product with trace elements
- The release time is not affected by substrate type, pH, microorganisms, level of irrigation or soil moisture
- FloraCote® starts to release after 2-3 weeks. Due to this specific mechanism the product is very safe to crops
- Release of nutrients is attuned to physiological requirements of the crops
- Minimised nutrient losses
- Strict quality control
- Highest safety for your crops
- Exclusive to Fernland
- Made specifically to our strict specifications and analysis

# BIOSTIM

**FloraTech Stimulate** is an advanced natural rooting substance and biostimulant for nursery management, agriculture, and turf-care professionals. Comprising  $1.2 \times 10^7$  Colony Forming Units (12 million) per mL, FloraTech Stimulate invigorates soil microbial activity, catalyses root growth and facilitates healthier soil while aiding in stress mitigation.

*Add to your order*

## Key Benefits of Stimulate

- ▶ Significantly amplifies the existing soil microbial population, aiding in your produce, plant or turf's growth, yield, and quality.
- ▶ Facilitates accelerated digestion of organic matter, thereby supplying essential nitrogen.
- ▶ Promotes mineralisation of Phosphorous, Potassium, and Trace Elements, making these vital nutrients more accessible to plants.
- ▶ It enables more effective fertiliser uptake, making your nutrient applications work harder and more efficiently.
- ▶ Generates CO<sub>2</sub> to improve soil aeration and water retention, reducing the need for extensive tillage.
- ▶ It helps disperse toxic levels of elements on soil colloids, improving overall soil health.
- ▶ Aids in the breakdown of crop residues and re-establishes beneficial soil microflora.
- ▶ Accelerates the degradation of biodegradable chemicals, including herbicides and pesticide residues.

# UL PLANTS

**FloraTech Rejuvenate**, exclusively available at **Fernland**, is a comprehensive root enhancement and rejuvenation solution. Perfect for professionals in turf care, nurseries, and agriculture, this organic-based formula is crafted to promote overall plant health and root vigour.

*Add to your order*

## Key Benefits of Rejuvenate

- ▶ **Biostimulant Properties:** A unique blend that stimulates root growth and enhances plant development.
- ▶ **Seaweed Extract:** Packed with growth hormones and micronutrients, ideal for promoting vigorous root systems and overall plant resilience.
- ▶ **Humate:** An essential ingredient for improving soil structure, boosting nutrient uptake, and enhancing water retention.
- ▶ **Organic Nutrient Complex:** Specially designed to support plants during critical growth stages like transplanting, ensuring rapid establishment and robust growth.
- ▶ **Bioactive Compounds:** A rich mix of saponins, complex carbohydrates, and amino acids, crucial for plant energy metabolism and stress adaptation.
- ▶ **Microbial Metabolites:** Foster a healthy soil ecosystem, enhancing nutrient availability and root health.
- ▶ **Essential Vitamins:** A blend of B1, B2, and B6 vitamins aids in regulating growth and enhancing stress resistance.
- ▶ **Protein Building Blocks:** Polypeptides and amino acids are vital for robust plant development and resilience.

## FLORAFERT<sup>®</sup> LIQUID

### High-N+K

FFHNK-10

- Slow-Release Formulation
- 40% N as Methylene Urea
- Rapid Leaf & Crown absorption
- Foliar or Soil applications
- Tank Mixing flexibility

26-0-10

### PK Phosphite

FFPKPHO-10

- 5% Microbial Metabolites
- Rapid leaf and crown absorption
- Improves disease and stress management
- Improves nutrient up take
- Tank mixing flexibility

0-12.5-21.8

### Extra Iron

FFEXTIR-10

- 5% Microbial Metabolites & 3% Organic Acid
- Essential for chlorophyll synthesis
- Rapid leaf absorption
- Promotes rich green colour
- Tank mixing flexibility
- Assists in nutrient uptake

6-0-0 6%Fe

### Plant Pro

FFPPRO-10

- 5% Microbial Metabolites & 8% Organic Acid
- Mg, Mn & organics supplements
- 100% chelated micros for fast results
- 12 essential ingredients!
- Visible plant response & greening

10-1-5 +TE

### Micro Total

FFMCTO-10

- 5% Microbial Metabolites & 2.5% Organic Acid
- Assists in nutrient uptake
- Promotes a rapid green up
- Improves micro-nutrient deficiencies
- Rapid leaf and crown absorption
- Tank mixing flexibility

5-0-0 Te + 6% Fe

### NK Balance

FFNKBAL-10

- Slow-release formulation
- 50% N as methylene urea
- Rapid leaf & crown absorption
- Foliar or soil applications
- Tank mixing flexibility

21-0-17

### Manganese Plus

FFMANGP-10

- 5% Microbial metabolites & 2.5% Organic acid
- Improves nutrient deficiencies
- Chelated formulation to increase mobility throughout the plant
- Assisting in chlorophyll production
- Tank mixing flexibility

10%Mn

### Recover Pro

FFRECP-10

- 5% Microbial metabolites + 0.5% Salicylic acid
- Assisting in plant recovery & stress mitigation
- Rapid leaf & crown absorption
- Assisting in disease suppression

4.2-12-22.5

Our exclusive **FloraFert Liquid** range has been developed by our team of industry experts and scientists to create the perfect range of products to suit your needs. If you have any questions please be sure to connect with our team.

## Cal Tec

FFCTEC-10

- Corrects calcium deficiency
- Helps reduce soil compaction
- For stress tolerance & turgidity
- Unique sugar-acid chelate
- Critical regulator of plant growth

**6-0-0 + 9%Ca**

## Nitro 28

FFNTRO-10

- Does not leach or volatilize
- Dual efficiency - foliar / root uptake
- Low salt index
- Stimulates soil microbes with carbon
- Consistent release with no surge growth

**28-0-0**

Our **FloraFert Liquid** fertiliser range is scientifically formulated for professionals seeking maximum plant and turf performance. These specialised blends address common nutrient deficiencies, optimising root development, growth rates, and overall plant health. FloraFert Liquid delivers the targeted nutrition that turf-care professionals, horticulturalists, and landscapers demand for exceptional results in their respective fields.

## Supreme Green

SUPREME-20

- Liquid stabilised Nitrogen + TE
- Fast turf green-up without rapid growth
- Iron and Magnesium to help aid turf deficiencies
- Tank mixing flexibility
- Manufactured in Australia

**20-0-0 + 6%Fe + 1%Mg**

*Exclusive to:*  

**Fermland**  
 A GROWING ADVANTAGE

## COMBI GREEN – FERNLAND EXCLUSIVE

Combi Green seaweed compound granular fertiliser is the perfect combination of seaweed extracts, slow release nitrogen (methylene urea) and other nutrients essential to healthy turf.

- ▶ Seaweed Extract provides a natural source of essential substances, and is rich in minerals such as calcium, magnesium and iron, as well as several natural seaweed plant growth regulators.
- ▶ Methylene Urea is a slow release form of nitrogen. Having low water solubility, it releases nitrogen slowly under the influence of soil microbes.

### Features & Benefits

- ▶ Complete turf nutrition and microbial activity enhancement in one application.
- ▶ Slow release nitrogen provides uniform growth between each mowing interval.
- ▶ Slow release nitrogen reduces the leaching of nutrient into the environment.
- ▶ Seaweed Extract increases the biological activity of beneficial microbes, improving the chemical and physical properties of the soil.
- ▶ Available in both Fairway Grade for regular turf maintenance, and a much finer Greens Grade for use on fine turf.
- ▶ Both grades are fully homogenised granules of uniform size and consistency which makes their application quick and efficient using any regular spreading method.

Comments	NPK	Size	SKU
Fairway Grade	17(6MU)-2.15-8.3 +5% Seaweed	5 kg 20 kg	DOUBGRNFAIR-5KG DOUBGRNFAIR
Greens Grade	17(6MU)-2.15-8.3 +5% Seaweed	20 kg	DOUBGRNGREEN

## TRU-PRILL – FERNLAND EXCLUSIVE

Tru-prill® is a highly dispersible, homogeneous fertiliser, trusted by superintendents around the world.

Each Tru-prill granule disperses into very fine micro-particles upon irrigation, allowing it to disperse completely into the canopy. Once applied, simply turn the water on and Tru-prill goes to work.

### COMPLETE NUTRIENT COVERAGE

Tru-prill fertilizers have multiple slow-release nitrogen sources and comprehensive formulations, so you can reduce your granular inputs and increase turf health.

Even at low rates, Tru-prill can still achieve complete nutrient coverage without speckling due to the dispersible technology, saving turf managers time and money

- ▶ Greens grade, dispersible homogenous technology, multiple slow release nitrogen sources. All Micro (Greens)
- ▶ Fully Homogeneous Micro Granules suitable for golf greens
- ▶ Slow release Nitrogen from Methylene Urea or IBDU and slow release Potassium
- ▶ A full complement of trace elements
- ▶ Tru-prill granules begin to disperse within minutes of irrigation for better nutrient dispersion and less disruption of play

## FLORAFERT TURFSTAR – FERNLAND EXCLUSIVE

Florafert & Floracote Topdress range offers you a premium selection of controlled-release, slow-release, and water-soluble turf-grade fertilisers. Exclusive to Fernland, these fertilisers help golf courses, sporting clubs, schools, stadiums, councils, and racecourses achieve superior turf quality. Their carefully designed formulation ensures clear visibility, easy spreading, and reduced dust for effortless application. Manufactured to our own specific requirements in the UK by a company boasting 20 years of experience in innovative fertiliser solutions, this range aligns with our commitment to excellence.

## FLORACOTE TOPDRESS + IRON

- ▶ A smaller granular size (130SGN) and low dust product
- ▶ High levels of slow release nitrogen to ensure steady growth for 3-4 months
- ▶ The combination of fast and slow release iron will give the turf a long-lasting green effect without excessive growth.
- ▶ Magnesium will help with chlorophyll production to produce sugars, greening up and strengthening the grass.
- ▶ Trace elements aid key ingredients to maintain strong and healthy turf grasses.

## ONYX GRANULAR

Onyx organic bio-stimulant fertiliser is a unique blend of nitrogen, potassium, trace elements, and amino acids, derived from concentrated plant extracts. It not only nourishes plants but also enhances germination, growth, and environmental stress resistance through its biostimulant properties. Onyx also supports beneficial soil micro-organisms, improving soil structure and nutrient availability. Suitable for various applications including golf greens, sports pitches, and horticulture, it comes in 1-2mm or 2-3mm sizes.

## THE REVOLUTIONARY VERDE-CAL RANGE

The Verde-Cal range of soil amendments, distributed by **Fernland** throughout Australia, represents opportunities for all Golf and Sporting clubs, Lawn care professionals, Landscapers and Growers to improve the soil profile, save money and time - and ultimately get accustomed to working with healthier turf.

### VERDE-CAL GYPSUM – FERNLAND EXCLUSIVE

#### Verde-Cal G Enhanced Gypsum (2.5kg - 5kg per 100 Square metres)

- ▶ Advanced Activated Gypsum provides Calcium which is immediately available. Usage at only one quarter the traditional rate giving equal and faster result.
- ▶ 250 kg of Verde-Cal Enhanced Gypsum equates to using 1000 kg of standard gypsum
- ▶ Leaches excessive amounts of sodium (Na) and magnesium (Mg) from soil colloids
- ▶ Supplies calcium (Ca) without raising pH
- ▶ Helps loosen compacted, heavy clay soils
- ▶ Excellent source of sulphate sulphur - readily available to the soil and the plant
- ▶ Improves soil aeration and water percolation

### VERDE-CAL LIME – FERNLAND EXCLUSIVE

#### Verde-Cal Enhanced Lime (2.5kg - 5kg per 100 Square metres)

- ▶ Advanced Activated Lime providing Calcium which is immediately available. Usage at only one quarter the traditional rate giving equal and faster result.
- ▶ 250 kg of Verde-Cal Enhanced Lime equates to using 1000 kg of standard lime
- ▶ Reduces hydrogen (H), sodium (Na), and chlorine (Cl) in the plant and soil
- ▶ Improves germination, stimulates root growth, and enhances microbial activity
- ▶ Increases essential nutrient absorption and translocation
- ▶ Improves soil structure (flocculation, water infiltration)
- ▶ Supplies optimal calcium (Ca) levels to plant cells to strengthen resistance to disease
- ▶ Balances the Ca:N ratio in the plant

## Line Marking Machines

Add to your order

### ATOM LINE MARKER (FOR USE WITH ATOMIC RTU PAINT)

SKU: BOW-ATOM

Precision, Low Volume Marking Machine for use with the ready to use ATOMIC paint.

**Low volume, precision application with as little as 1.5L used for a soccer field.**

- ▶ Durable lightweight, stable construction
- ▶ Hollow-Cone / misting nozzle technology
- ▶ High pressure self-priming pump
- ▶ Non-drip, instant shut off
- ▶ Integral cleaning system
- ▶ Integral quick-bleed system
- ▶ High capacity 12v battery
- ▶ Bearing wheels on SS axle
- ▶ Puncture proof tyres
- ▶ Optional Athletics boom

### GMX LINE MARKER

SKU: BOW-GMX

The revolutionary GMX offers the ultimate in precision line marking application incorporating a number of comprehensive, flexible spray options.

- ▶ Fully adjustable line width
- ▶ Central or off set spraying
- ▶ Protected, quick release spray head assembly
- ▶ Optional twin jet nozzle
- ▶ Optional side marking arm (L/R)
- ▶ Optional Athletics Boom

#### Total Flexibility - Durable, Modular Design

The GMX incorporates a removable 25lt Paint Tank that offers the operator total flexibility when changing, cleaning or filling. This unique feature also allows the operator the option to remove the Paint Tank prior to lifting the GMX for transportation to site, offering flexible independent operation.

- ▶ Modular 'drop fit' removable paint tank
- ▶ Tough, durable construction
- ▶ Quick release connectors
- ▶ Exchangeable tank avoids cross contamination (Chemicals)
- ▶ Wide aperture with filter for easy fill
- ▶ Removable tank for easy cleaning and colour change

### THE TRIKE – FAST, EFFICIENT LINE MARKING

SKU: BOW-TRIKE

Manufactured as an independent, stand alone, 'ride on' line marking or chemical spray machine. The Trike is simple to operate and requires no pre-assembly or attachment to other utility machinery, again leading to a further reduction in line marking preparation, time and cost.

Speed and simplicity combine to offer significant reductions in line marking times, offering high efficiency and a direct reduction in operational cost.

#### Ultimate in versatility

- ▶ Dual Purpose - Line Marking / Chemical Spraying
- ▶ 3-4 times faster than conventional Marking
- ▶ Reduces operational cost
- ▶ Reduces operator fatigue
- ▶ Low maintenance proven Honda engine
- ▶ Soft "turf saver" tyres
- ▶ Tight turning circle
- ▶ Ergonomic adjustment

#### Line Marking

- ▶ In-line' marking offers exceptional accuracy
- ▶ Single fan - high definition - adjustable line width
- ▶ Integral hand lance for spot marking
- ▶ Optional front or rear mount

# TURF TANK

## ONE AUTONOMOUS LINE MARKING ROBOT

Add to your order

- ▶ More time for other tasks
- ▶ Improve the quality of your facility
- ▶ Ditch the strings and manual measurements
- ▶ No more walking behind the line marker
- ▶ User-friendly tablet
- ▶ No worries about the fading lines
- ▶ No extra time wasted for overmarking
- ▶ No effort

## LINE MARKING PAINTS

### ATOMIC RTU

Unparalleled Coverage - as little as 1.5L to over-mark a standard soccer field!

- ▶ 10L Drum

Colour	SKU

## UNI-SCRATCH

The Campey™ Uni-Scratch™ is the ideal solution for those looking for a professional and effective maintenance of natural and synthetic grass surfaces.

The Uni-Scratch™ moves on 4 supporting rollers which are adjustable in height to allow the most appropriate working depth. The rotors can be equipped with springs or linear brushes in PPL. Rear linkage to tractors of at least 30hp.

1.4m Wide - SKU: CP-UNISCR1.4

2.0m Wide - SKU: CP-UNISCR2.0

Add to your order

### PEDESTRIAN AERASEEDER

The Campeys' 60cm Pedestrian Aeraseeder is a compact and precise machine that effectively overseeds hard-to-reach areas. Its seeding area is 60cms, and it is only 83cms wide. It can be used to overseed golf greens, cemeteries, goal mouths, gardens, and other bare areas. The multi-spiked roller can create approximately 800 holes per square yard, which saturates the top surface with holes. The stainless steel seed apertures, brush, and smooth packing roller systems provide a high percentage of grass seed germination.

SKU: CP-AERAS-0.6

### BM50 VERTI-CUTTER

The Campey BM50 Verti-Cutter is a professional scarifier that uses fixed blades. It only requires the worn blades to be disassembled, not the whole transmission and rotor. The rotor has high performance, ensuring excellent work even when the blades are not in optimal condition. The standard version has 3mm thick blades made of HARDOX material spaced 30mm apart.

SKU: CP-BM50.16

### TDS2 SUB SURFACE SPORTS TURF DECOMPACTOR

The CAMPEY™ TDS2 is a heavy-duty twin leg subsoiler specially designed for the turfcare industry. It can easily relieve compaction and aid drainage at depths ranging from 9.5 to 37.5cm when operated behind a 40hp tractor on turf tyres. With a weight of under 430kgs and Cat I and Cat II hitch, it can create fissures for grass roots to penetrate, drain excess water, and link existing drainage without external hydraulics or PTO, with minimal surface disturbance.

SKU: CP-TDS2

Add to your order

## AERASEEDER

The Campey™ Aeraseeders are a range of heavy-duty '2-in-1' overseeders designed for overseeding greens, tees, sports fields & other similar fine turf surfaces, with minimal disruption to the existing sward. The unique angled coned rollers produce approx 1750 holes per sq. metre, and the rear mounted brush ensures that seed is swept into the holes created by the coned roller. The hopper has an internal agitator to ensure a smooth seed flow and a floating headstock ensures good contour following. Available in 2 working widths. The Aeraseeder can be supplied coned / coned or coned / flat roller.

SKU: CP-AERAS-1.2

## DRAG MATS

The CAMPEY™ Dragmats come in a variety of different sizes and are available in heavy-duty reinforced rubber or steel construction. Dragmats are ideal for rubbing-in top dressings, dew and clippings dispersal. Small mats can be hand-pulled, while the wider units are more suited to towing on the optional 3-point frame. Available in 4 different widths, and 2 different thickness's (rubber) for a variety of different handling applications and tasks.

### MARTIN LISHMAN SPRAYER

Combining control and power with responsive easy handling, the Martin Lishman Micro-Spray pedestrian sprayer is designed for all types of sports grounds, golf courses and landscaping work. The Micro-Spray brings a new concept in spraying versatility to the groundsman's armoury. First launched in 2011, the Micro-Spray now comes with an upgraded specification, making it more versatile in a wider range of situations.

## Sayonara 10 GR

*Pre-Emergent Herbicide*

- ▶ Reliable control of numerous weeds in both turf and nursery stock
- ▶ The first granular form of Prodiamine in the Australian market
- ▶ Certified for a broad spectrum of nursery applications under APVMA Permit number PER92821
- ▶ Granular formulation allows for even and precise application, reducing the risk of overspray and minimising impact on non-target plants.

## Specticle

*Pre-emergent Herbicide*

- ▶ Superior turf quality and playability
- ▶ Longer residual control
- ▶ Easier application scheduling
- ▶ A significant step for resistance management (new mode of action)
- ▶ A significant reduction of herbicide placed in the environment
- ▶ No concerns about stains or odour

## Dismiss Granular Ornamental

*Pre-emergent Herbicide*

- ▶ Dismiss™ ornamental herbicide, combining two proven active ingredients, delivers broad-spectrum control of broadleaf and grass weeds, meeting the high standards of the nursery and landscaping industry.
- ▶ Offers up to three months of control for over 40 weed species in both potted and open-grown ornamentals, ensuring prolonged protection.
- ▶ Features an easy-to-apply, low dust, low odour granular formulation, enhancing the aesthetic and commercial value of potted plants with effective weed management.

## Barricade

*Pre-Emergent Herbicide*

- ▶ Flexible application window – well before weeds germinate and with the added flexibility to delay wash-in for a few days if necessary
- ▶ Allows for fewer herbicide applications, which creates efficiencies in productivity and fewer weed management interventions per season
- ▶ Exempt from poison scheduling, which reduces worker risk and disruption to the community

*"Promoting plant **health** and productivity."*

## Freehand

*Pre-Emergent Herbicide*

- ▶ Freehand offers broad-spectrum weed control with a unique dual-action formula (Groups D and K), safe on various ornamental crops and warm-season turfs, providing up to three months of control for over 60 tough weed species.
- ▶ Its granular formulation ensures easy spreading with flexible application rates (100-200 kg/ha), facilitating straightforward use for effective weed targeting.
- ▶ Delivers excellent residual control, halting weed germination for up to three months with a single application, and remains active on the soil surface without immediate watering, enhancing long-term effectiveness.

Here at **Fernland** we are constantly sourcing and importing **quality products** from the industry leaders all over the world. Fungicides effectively prevent and treat plant diseases, enhancing overall plant health and productivity in various agricultural and horticultural settings.

<b>Insect Sticky Trap Blue (Thrips)</b> - 25cm x 10cm Sheet	Pack of 10	STICBLU

## OCP PRODUCTS

Name	Size	SKU
<b>Azamax</b>	1 L	AZAMAX-1
	5 L	AZAMAX-5
	20 L (4x5L)	AZAMAX-20
<p>A natural insecticide produced from the patented process of extracting Azadiractin (one of the most potent natural insecticides known to man) from neem seed kernels. Azamax has several modes of action but is essentially an Insect Growth Regulator and anti-feedant. Effective against soil pests and most leaf sucking and chewing pests.</p>		
<b>Eco-Oil</b>	1 L	ECOILGARD-1
	5 L	ECOOIL-5
	20 L	ECOOIL-20
<p>A certified organic miticide/insecticide spray made from Australian grown canola oil, enhanced with a blend of teatree and eucalyptus oils. It is registered for the control of aphids, whitefly, two-spotted mite, scale and citrus leafminer. There is less risk of burning foliage than with traditional mineral oil sprays, no withholding periods or re-entry restrictions, and offers no potential for insect spray resistance.</p>		
<b>EcoCarb</b>	5 kg	ECOCARB-5
	20 kg	ECOCARB-20
<p>A certified organic fungicide for the control of Powdery Mildew and Black Spot on roses. Ecocarb is a wettable powder containing activated potassium bicarbonate, which on contact with foliage alters the pH of the leaf surface preventing the growth and spread of the fungus. Apply with eco-oil for superior results.</p>		
<b>EcoCarb Plus</b>	5 kg	ECOCARBPL-5
	20 kg	ECOCARBPL-20
<p>Ecocarb PLUS combines the curative action of food grade Potassium Bicarbonate with the Systemic Acquired Resistance (SAR) effect of Potassium silicate. When applied on a regular basis, Ecocarb PLUS will control Powdery Mildew in Grapes, Vegetables, Strawberries, Roses and Apples and Rust in ornamentals (Geraniums). Now with the addition of Potassium silicate, Ecocarb PLUS controls Brown rot in Nectarines, Black spot in Apples and suppresses Downy mildew in Grapes.</p>		
<b>Pyganic Organic Insecticide</b>	1 L	PYGAN/1L
	3,78 L	PYGAN/3,78L
<p>PyGanic® is based on Natural Pyrethrum, a botanical insecticide derived from chrysanthemum daisies grown in Tasmania and other parts of the world. PyGanic® has no residues so can be used up to the day of harvest. PyGanic® is a fast knockdown insecticide making it compatible with IPM due to the fact that no residues remain after spraying. PyGanic® is a known insecticide resistance breaker because the natural variation of pyrethrins in the product prevents insects building any resistance.</p>		
<b>Sarsil</b>	10 L	SARSIL-10L
<p>A high analysis liquid Potassium silicate designed for use as a foliar or soil applied crop conditioner.</p>		
<b>Slasher - Pelargonic Acid</b>	1 L	SLASH-1
	5 L	SLASH-5
	20 L	SLASH-20
<p>Slasher Weedkiller is a Registered Organic herbicide that is glyphosate-free and rapidly kills weeds, moss, algae and lichen. It works quickly to easily control weeds the organic way!</p>		
<p>Features:</p> <ul style="list-style-type: none"> <li>▶ Kills weeds, moss, algae and lichen on contact</li> <li>▶ Rapid action, desiccating plants within hours</li> <li>▶ Doesn't require heat or sunlight to work</li> <li>▶ Can be used anywhere in the garden and around the house</li> <li>▶ Active ingredient made from plant oils (GM free)</li> <li>▶ No lasting spray residues (100% biodegradable within a few days)</li> <li>▶ Does not contain glyphosate</li> <li>▶ Registered Organic for use in organic farms and gardens</li> </ul>

Our coir is sourced directly in India & Sri Lanka from some of the world's largest and most reputable coir producers.

At **Fernland**, we insist on only stocking the highest quality coir which undergoes stringent quality testing - this means you can be assured of your crop safety. Independent testing has consistently verified the safe low salt levels we insist on (EC <1ms/cm @ 1:1.5 dilution).

Not only is our coir of exceptional quality, our clients have discovered that our compressed blocks have some of the highest yields within the Australian horticultural industry.

It is true - you get what you pay for...  
Can you afford to use just any coir?

Are you in a rush?  
Give our 'knowledgeable' sales team a call to place your order!

## Striking Hormones

For industry professionals working in nurseries, turf care, landscape, and agriculture, using rooting hormones can be a **highly effective** method to propagate plants more efficiently and with greater success. These hormones can be particularly valuable when working with plants that are difficult to root or during times of the year when rooting is naturally slower.

When applying striking hormones, it's important to follow the **instructions** carefully. Typically, the cutting's base is dipped into the hormone powder or solution before planting. It's crucial to use the correct concentration, as too much hormone can inhibit root growth.

Rooting hormones can be a valuable addition to the growers toolkit, offering a practical solution to enhance plant **propagation**.

## ECO ORGANIC RANGE

Name	Pack Size	SKU
<b>Eco-Oil</b> <i>RTU Trigger Sprayer</i>	6 x 250mL 10 x 500mL 6 x 750mL 6 x 1L	ECOILGARD-250-6 ECOILGARD-500-10 ECOILRTU-750-6 ECOILGARD-1-6
Eco-Oil is a certified organic miticide/insecticide spray made from Australian grown canola oil, enhanced with a blend of teatree and eucalyptus oils. It controls a broad range of insects including scale, mites, aphids, whitefly and leafminer. There is less risk of burning foliage that with traditional mineral oil sprays and no withholding periods on edible crops.		
<b>Eco-Seaweed</b>	12 x 100g 8 x 600g	ECOCWEED-100-12 ECOCWEED-600-8
Eco-Seaweed is a certified organic, powdered seaweed. eco-cweed is 100% soluble and highly concentrated making it the best value for money seaweed product on the market. eco-cweed makes 200L of pure seaweed solution and will treat up to 1000m <sup>2</sup> of new lawn. University trials have proven eco-cweed increases growth, flowering and fruiting, enhances root development; and reduces plant stress.		
<b>Eco-Fungicide</b> <b>Eco-Fungicide</b> – <i>RTU Trigger Sprayer</i>	6 x 500g 6 x 750mL	ECOFUNG-500-6 ECOFRTU-750ML-6
Eco-Fungicide are certified organic fungicides made from specially formulated food grade potassium bi-carbonate. It controls Powdery Mildew and Black Spot, attacking existing infections and preventing new outbreaks. Apply with eco-oil for superior results.		
<b>Eco-Hydrate</b>	10 x 500mL	ECOHYD-500-10
Eco-Hydrate contains a blend of organic humectants (water attractants) and soil wetting agents, with added seaweed extract and plant growth stimulants. eco-hydrate reduces water use (on average by 50%) and plant stress. Perfect for establishing seedlings and turf. Great for pot plants and balcony gardens. 100% biodegradable.		
<b>Eco-Slasher Pelargonic Acid Weedkiller</b>	6 x 750mL RTU 6 x 1L	SLASH-750-6 SLASH-1/CTN6
Organic "burn down" fast-acting Herbicide		
<b>Eco-Aminogro</b>	10 x 500mL 6 x 1L	ECOAMINO-500-10 ECOAMINO-1-6
Eco-Aminogro is a registered organic amino acid-based plant fertiliser and soil conditioner. It contains a unique blend of amino acids and essential plant nutrients.		
<b>Eco-Neem</b>	10 x 100mL 6 x 250mL	ECONEEM-100-10 ECONEEM-250-6
Eco-Neem is a plant based organic insecticide made from an extract from the kernel of the neem tree and other oil seeds. eco-neem is processed using patented technology that concentrates and preserves the active properties of neem without the inclusion of potentially harmful impurities, solvents or other unknown ingredients.		
<b>Eco-Male Fruit Fly Trap</b>	6	ECOFly-6
Monitoring device for fruit fly, attracts and kills males only.		
<b>Eco-Wick</b>	12	ECOWICK-12
Replacement wick for fruit fly trap.		
<b>Eco-CLM Trap</b>	10	ECOCLM-10PACK
Citrus Leaf Miner Trap and Lure.		
FUNGICIDE PRODUCTS IN HOME GARDEN PACKS

Fivestar is water-based Bifenthrin formulation with a wide range of registrations for control of insects in 5 key areas - Turf, Ornamental Plants, Public Health, Termites and General Domestic Pests.		
<b>Anstar Granular Insecticide</b> <i>(Bifenthrin 2G)</i>	12 x 500g	PCT0051-12
<b>Surefire Fipronil Granular Ant Killer</b> <i>(0.25g/kg fipronil)</i>	12 x 500 g	PCT800/500G-12CTN
<b>Fipronil Granular Ant Killer</b> <i>(0.25g/kg fipronil) non-repellent ant control</i>	12 x 500g	PCT800-12
<b>Surefire Rodenticide</b> 15 gram Blocks	20 x 150 g 10 x 1 kg	PCTVB001/150G-20CTN PCTVB002/1KG-10CTN
A waxed block for ease of use, and partially weather-proof. Potent active ingredient for single-feed control of rats and mice. Contains a bittering agent as a deterrent for domestic pets. Packaged in a re-sealable plastic pouch.		
<b>Cera Trap Fruit Fly Attractant 600mL</b>	18 x 600mL	1CCERT.600-18
Cera Trap® contains a unique protein based liquid solution that is very attractive to both female and male fruit flies. Once the lid is removed from the bottle, the smell of the liquid lures the fruit flies into the specially designed trap. Unable to escape they remain in the trap and drown in the liquid.		

### DEFENDER

<b>Pyrethrum RTU - insecticide</b>	6 x 750mL	190581-6
<b>Snail &amp; Slug Pellets - With Child Resist Cap</b>	12 x 600g	190090-12

### HERBICIDES

<b>Surefire Glyphosate 360 Herbicide</b>	5 x 1 L	PCT0096/1L-5CTN
<b>Surefire Glyphosate 360 Herbicide</b>	4 x 5 L	PCT0097-5L-4
<b>Surefire Glyphosate Weedpro 540 Bio Herbicide</b>	5 x 1 L	PCT540BIO/1L-5CTN
<b>Surefire Metsulfuron</b> <i>(600g/kg metsulfuron methyl)</i>	10 x 500 g	PCT0027.500-10CTN

## Invest In A Better Growing Environment!

Create more **consistency, productivity, and predictability** with a structure from EnviroTec. We provide growers across Australia with the poly greenhouse they need to create an optimal growing environment for their crops.

We understand the importance of a healthy environment and are here to help you achieve it.

### With Structures Such As:

- ▶ **Greenhouses**
  - Vertical Wall Tunnelhouses
  - Gutter Connected Tunnelhouses
  - Vented Roof Tunnelhouses
- ▶ **Shadehouses**
- ▶ **Hail / Bird Net Log & Cable Structures**
- ▶ **Reinforced Plastic or Growrite Shadecloth Covers**
- ▶ **Accessories such as**
  - Climate Control
  - Systems
  - Air Ventilation & Movement
  - Ceiling Screens
  - & So Much More!

All structures are available in easy-to-install KIT form with instructions. Or they can be fully assembled by our experienced team members.

### Fernland Nursery Supplies

#### Unrivaled Quality for Every Stage of Plant Growth

At **Fernland**, we offer a complete range of nursery supplies to support your plants from planting through to sale. With our years of industry experience and an expansive product range, we bring unparalleled knowledge and expertise. We provide superior products ranging from advanced soil media and fertilisers to pest and disease management solutions, ensuring your nursery thrives. Our commitment to excellence means we not only supply the essentials but also innovate to enhance plant quality and increase yields. Trust **Fernland** to be the backbone of your nursery success, where quality plants begin with quality supplies.

Contact our dedicated nursery field team to learn more.

### Fernland Turf Care Products

#### Comprehensive Turf Care for Superior Surfaces & Renovation

Our Turf Care products are designed to produce professional-grade playing surfaces for sports fields, golf courses, parks, and gardens. With our industry-leading range, including specialised fertilisers, weed and pest management solutions, and turf renovation equipment, achieving top-quality turf has never been easier. Our decades of experience mean we understand the nuances of turf management, allowing us to provide products that ensure healthy and visually appealing turf. **Fernland's** expertise extends to turf renovations, offering solutions that rejuvenate and transform any turf area into a high-quality playing surface.

### Fernland Landscape & Revegetation Supplies

#### Comprehensive Solutions for Landscape & Revegetation Success

**Fernland** offers an extensive range of products for those involved in landscaping and revegetation. Our selection includes landscaping fabrics like weedmat and erosion control fabrics, tree protection solutions such as tree guards, and top-quality tools like secateurs and saws. Additionally, we provide specialised and effective chemical control solutions. Our expertise and broad product range ensure we can meet the diverse needs of our clients, supporting projects that not only look great but are also sustainable and environmentally friendly.

Contact our dedicated landscape and revegetation field team to learn more.

### Fernland Protected Cropping Supplies

#### Tailored Solutions for Optimal Horticultural Production

In the protected cropping sector, **Fernland** excels by offering a specialist range that ensures better yields and efficient growing operations. From customised coir grow bags and diverse growing substrates to planting bags and propagation supplies, our products cater to every aspect of protected cropping. With global contacts and a commitment to quality, we source whatever you need to achieve superior outcomes in your horticultural projects. Trust **Fernland** to provide the expertise and range to enhance your protected cropping success, helping you to produce healthier, more abundant crops.
